2.NBT.9

Explain why 325 = 300 + 20 + 5.

The two sides of the equation are equivalent, because there are an equal number of 100s, 10s, and 1s on each side. One side of the equation shows the expanded form of the numbers, while the other shows the conventional form. Because the total value of each digit place is equivalent on both sides, the expressions on both sides are equal.
