 UNIT 5: Earth, Outer Space, and Beyond

Directions: Read the passage carefully. Then, read each question and circle the letter of the best answer.

READING PASSAGE: Exploring the Night Sky

One evening, I had the opportunity to look through a powerful telescope. As I observed the night sky, I could clearly see bright stars and distant planets. A scientist guiding the observation explained how planets move around the sun and why stars appear to twinkle from Earth. Hearing the information from an expert helped me better understand complex ideas about space. The experience made science exciting and inspired me to learn more about the universe.

1. How does point of view affect the passage? (RL5.6)

- A. It changes facts
- B. It makes information engaging
- C. It removes details
- D. It adds diagrams

2. Which context clue helps explain the word telescope? (L5.4)
