

Instruction for Math Assessment- Computation and Concepts and Application

Computation

We will be conducting untimed assessments. The purpose is to measure what they can do. Grades 3-5 will start with G1 assessment. You will give the test and allow the students to complete it. You will score according to the key. The expectation is to score 80% of the total points. If they score 80% of the total points, you will give the next level and repeat. If they do not score 80%, you stop assessing and record their data on the Shared Drive- Assessment- Benchmark.

The Scoring Table to move from level to level is as follows:

Grade	# of point needed
First Grade	30
Second Grade	29
Third Grade	41
Fourth Grade	114
Fifth Grade	110

Concepts and Applications

This assessment will be given untimed. You should not give this assessment until the student has passed G1 Computation. This assessment starts at Grade 2. This assessment should be read out loud. The score to be achieved to move on to the next level will be 80% of the total possible points. (It should be noted that money questions are not to be included.) Below is the table of the number of points needed to move to the next level.

Grade	Points Needed	Question to Skip
Second Grade	47	omit #16
Third Grade	71	omit #19
Fourth Grade	94	omit #16
Fifth Grade	78	omit #11
